

# MATTHEWS

A close-up photograph of a dandelion seed head with its seeds blowing away, set against a dark red background. The seeds are captured in motion, creating a soft, ethereal glow. The stems of the dandelion are visible at the bottom, and the overall composition is artistic and serene.

FAN COMPANY

**PRODUCT CATALOG**  
**Volume III**

Matthews Fan Company has been at the forefront of bringing unique ceiling, wall and portable fan products to both the residential and commercial markets since 1992.

Our innovative fans combine traditional, contemporary and industrial designs, retrospective elements and always high performance.

Matthews proudly integrates American parts and labor into the production of all of our products.

Visit one of our retailer partners or contact us for more information regarding our quality products and customization.

An aerial photograph of a dense evergreen forest, showing a vast expanse of green trees from a high angle.

# GREEN

A bright blue sky with scattered white clouds, providing a clean background for the text.

# MATTERS

**Matthews' fans achieve some of the highest efficiency ratings in the industry through:**

- DC Motor technology allows for large, powerful blades which provide more robust airflow and ultra-quiet operation.
- Rotational fans reduce HVAC costs by mixing ambient air more thoroughly.
- Directional and Wall fans provide columnar airflow which can be customized.

**Matthews does not field destroy**

- 95% of damaged and defective materials are recycled or re-purposed.

**Matthews achieves low defect rates because:**

- All fans are visually inspected before shipping.
- All rotational and oscillating fans are bench tested before shipping.

# Acqua

The Acqua 360° rotational fan is thoughtfully designed to resemble the molecular structure of water, Earth's most precious resource. The Acqua offers fluid lines and quiet axial rotation. Its fan heads can be infinitely positioned in 180-degree arcs for optimum air movement; the greater the angles of the motors to the horizontal support rods (up or down), the faster the axial rotation. A slow, controlled axial rotation is achieved by both fan head position and fan blade speed. Matthews rotational fans circulate heat and air-conditioning more efficiently than traditional paddle fans. Constructed of cast aluminum and heavy stamped steel, the Acqua carries a limited lifetime warranty.

# Dagny LK

With clean, fluid lines, the Dagny LK 360° rotational fan is a striking centerpiece in any space. Its movement about its cylindrical center housing is smooth and quiet. Dagny LK's dual fan heads can be infinitely positioned in 180-degree arcs for optimum and customized air movement. As the angle between the fan heads and the horizontal support rods is increased, so does the speed of Dagny LK's axial rotation. Matthews rotational fans circulate heat and air conditioning more efficiently than traditional paddle fans. Constructed from cast aluminum and heavy stamped steel, the Dagny LK carries a limited lifetime warranty. This model is also available without a light kit as the **Dagny**.

COASTAL WET LOCATION  
100% 316 MARINE GRADE STAINLESS STEEL

# Donaire

With teardrop motor housing, the 52" Donaire 316 marine grade stainless steel coastal wet location ceiling fan is transitional in design. Donaire is finished in brushed bronze, brushed stainless, or gloss white, equipped with all weather blades and 16W LED dimmable light kit with optional metal cover. Constructed of entirely 316 marine grade stainless steel, the Donaire carries a limited lifetime warranty.

# Eliza *Geometry in Motion*

Designed by Chicago architect Stephen Katz in 2013, the wet location Eliza blends a beautiful technically derived form with superior function and movement. The unique blade shape is designed to maximize air movement at the outer edge of the blade. The result is more efficient air velocity rings, less blade drag and greater motor optimization. Equally important is Eliza's stationary visual statement which combines modern utility with minimalist geometry. Constructed of cast aluminum and heavy stamped steel, the Eliza has a limited lifetime warranty.

# Kaye

The beautiful Kaye 3-speed versatile-mount, wall or ceiling fan, oscillates left to right, forward and reverse, in a 90° sweep. Its design is reminiscent of vintage train cabin ventilators of yester-year, and will cool down your favorite space with poise and determination. Kaye's profile is low, however its strength and character define it. Kaye can be mounted in any small or awkward spaces or in front of HVAC ducts to improve the efficiency of the heating, ventilation or air conditioning of your favorite space. Constructed of cast aluminum and heavy stamped steel, the Kaye carries a limited lifetime warranty.

Voltage	110 or 220
Motor Type	AC
Oscillation	Yes
Fan Diameter	13 inches / 33 cm
Fan Height	13 inches / 33 cm
Fan Projection	17.5 inches / 44 cm
Ceiling Mount Overall Drop	17.5 inches / 44 cm
Recommended Mounting Height	Approximately 24 inches / 61 cm from ceiling
Fan Guard	Safety Cage
Blade Pitch	31°
Environment	Damp locations for all finishes Neither coastal, saltwater nor chlorine compatible
Ambience	Soothing White Noise
Safety Certification	ETL / CETL
Warranty	Limited Lifetime

NEW JAN 21, 2020 DOE MOTOR EFFICIENCY DATA

RPM (Low / High)	1213 / 1445
CFM (Low / High)	868 / 1303
Watts (High)	47.68
CFM/Watt (High)	29
Blade Pitch	31°

STANDARD EQUIPMENT

Safety cage	
Side-mounted wall junction box	
<p>White Decora-style, 3-speed wall control</p>	<p>ACCESSORY</p>
	<p>Black 3-speed RF remote control</p>

Note:  
1) A three-wire system is needed to operate the oscillation mechanism independent of the fan blades.  
2) The remote control receiver will not fit behind the wall canopy. A clever electrician will need to hide the receiver in wall or ceiling according to code.

The Laura 3-speed, left-to-right 90 degree oscillating wall fan offers the best in function. Its patented design boasts a whisper-quiet DC motor, remote control operation and easy 2-wire installation. Compact and powerful, Laura can be mounted in small, awkward spaces or in front of HVAC ducts to improve the efficiency of heating, ventilation or air conditioning. Constructed of cast aluminum and heavy stamped steel, Laura carries a limited lifetime warranty.

# Molly

Designed by Chicago architect Stephen Katz in 2018, the Molly ceiling fan combines modern organic geometry with outstanding performance and function. The blade shape was developed using advanced computer software which allowed the design to achieve a complex form. The result is a clean, natural and contemporary look perfect for any room or décor. Available in gloss white or matte black finish, Molly will complement a variety of design styles while also providing a fresh and unique, modern statement. Constructed of cast aluminum and heavy stamped steel, the Molly carries a limited lifetime warranty.

# Ar Ruthiane

The Ar Ruthiane's unique hourglass support arms grasp bullet-shaped motor housings which rotate 360° about its teardrop center. The fan heads can be infinitely positioned in 180-degree arcs for optimum air movement; the greater the angles of the motors to the horizontal support rods (up or down), the faster the axial rotation. A slow, controlled axial rotation is achieved by both fan head position and fan blade speed. Matthews 360° rotational fans circulate heat and air conditioning more efficiently than traditional paddle fans. Constructed of cast aluminum, heavy spun and stamped steel, the Ar Ruthiane carries a limited lifetime warranty.

-------------	------------------------	----------------

# Duplo-Dinamico

Few designs can match the timeless and sophisticated aesthetic of the Duplo-Dinamico 360° rotational fan. Other manufacturers have tried to reproduce this unique design, though all have proven to be of lesser quality and durability. The fan heads can be infinitely positioned in 180-degree arcs for optimum air movement; the greater the angles of the motors to the horizontal support rods (up or down), the faster the axial rotation. A slow, controlled axial rotation is achieved by both fan head position and fan blade speed. Matthews 360° rotational fans circulate heat and air conditioning more efficiently than traditional paddle fans. Constructed of cast aluminum, heavy spun and stamped steel, the Duplo carries a limited lifetime warranty.

shown in Black with metal blades  
and decorative cage

# Italo Ventania

The Italo Ventania is the largest 360° rotational fan in the Matthews Fan Co collection. Its vortex sculpted arms grasp also remarkable, side-mounted fan heads in gentle, equatorial rotation. The fan heads can be infinitely positioned in 180-degree arcs for optimum air movement; the greater the angle of the motor to the horizontal support rods (up or down), the faster the axial rotation. A slow, controlled axial rotation is achieved by both fan head position and fan blade speed. Matthews 360° rotational fans circulate heat and air conditioning more efficiently than traditional paddle fans. Constructed of cast aluminum, heavy spun and stamped steel, the Ar Ruthiane carries a limited lifetime warranty.

The Vent-Bettina 360° rotational fan is thoughtfully designed with its arms gently upward curving. The fan offers fluid lines and quiet axial rotation with motor heads which can be infinitely positioned in 180-degree arcs for optimum air movement; the greater the angles of the motors to the horizontal support rods (up or down), the faster the axial rotation. A slow, controlled axial rotation is achieved by both fan head position and fan blade speed. Matthews 360° rotational fans circulate heat and air conditioning more efficiently than traditional paddle fans. Constructed of cast aluminum, heavy spun and stamped steel, the Vent-Bettina carries a limited lifetime warranty.

Fan Blade	Solid Mahogany	WD
	Wood Blade	MTL
	Metal Blade	

## TECHNICAL SPECS

Fan Weight	19 lbs
Voltage	110 or 220
Motor Type	AC
Rotation	Yes
Downrods Lengths <i>Field cuttable.</i> <i>Non-threaded</i>	inches: 10, 20, 30, 48, 72 centimeters: 25, 51, 76, 122, 183
Downrod Diameter	.75 inch
Overall Drop	7 inches / 18 cm + downrod length
Environment	Damp location with protective powder or clear coat only. Neither coastal, saltwater nor chlorine compatible.
Ambience	Soothing White Noise
Safety Certification	UL / CUL
Warranty	Limited Lifetime

## NEW JAN 21, 2020 DOE MOTOR EFFICIENCY DATA

Fan Head Options	Solid Mahogany Wood	Metal with Guard
Fan Diameter	44 inches / 112 cm	42 inches / 107 cm
Fan Blade Diameter	16 inches / 41 cm	13 inches / 33 cm
Guard Options	No Cage Option	Decorative Cage or Safety Cage with tight tines
RPM (Low / High)	796 / 1252	699 / 1101
CFM (Low / High)	2070 / 329	1346 / 2077
Watts (High)	87.32	89.63
CFM/Watt (High)	37.71	23.17
Blade Pitch	19°	31°

## STANDARD EQUIPMENT

One downrod of 10 inches / 25 cm		
Flat ceiling canopy		
Decora-style, 3-speed wall control in white		
OPTIONAL EQUIPMENT		
29° vaulted ceiling mount and canopy		

Matthews Fan Company's customer service and technical assistance are available Monday through Friday, 7AM to 7PM CST, at (847) 680-9043.
